

Energy Efficiency Program for Business

2025 Non-DLC category product approval form

Use this form if your 2025 project includes non-DLC lighting that meets our evaluation criteria

A lighting product that is neither listed by the DesignLights Consortium (DLC®) nor ENERGY STAR® certified may be approved for incentives if the program team determines that the product meets current DLC or ENERGY STAR performance criteria. We compare the closest appropriate DLC category and its efficiency requirements to assess these products.

These LED products are not eligible for incentives through the Energy Efficiency Program for Business:

- Screw-in LED products, with the exception of DLC-listed Mogul-base lamps or ENERGY STAR certified rated screw-in retrofit fixtures
- Any products that receive an incentive through the DTE Lighting Instant Discount Program (dteenergy.com/business)

The following information is required to review LED products which are not DLC certified, but may meet our program criteria and be eligible for incentives:

Product manufacturer: _____

Specific model number being used: _____

Explanation for installing this specific product: _____

Technical documentation required (attach to your reservation application, along with this form):

- Specification sheet
- Warranty terms and conditions (if not included on the specification sheet)
- IES-LM-79-08 testing report from an accredited laboratory (see DLC website for more information)

Notes: You may be required to submit photometry for certain products. DTE reserves the right to deny an application for incentives based on product reference data. Funds will be awarded on a first-come, first-served basis; program based on availability of funding and may end at any time; certain other conditions apply; contact 855.748.2525 for details.
