Agenda

- Safety Moment & Introductions
- New for 2025
- Applications
- Customer Bonuses
- Offerings
- Portal and OA Demo
- Q&A
- Survey & Suites

Safety Moment

Prepare for warmer weather with lawnmower safety

Maintaining safety while using a lawnmower is crucial to preventing accidents and injuries. Let's take a quick look at some essential safety tips before you start mowing.

- **Wear Protective Gear**
Always wear safety glasses to protect your eyes from flying debris, sturdy footwear to prevent foot injuries, long pants to shield your legs, and ear protection if you're using a loud mower.
- **Check Your Equipment**
Before using the lawnmower, inspect it for loose parts or damage, ensure the blades are sharp and in good condition, and check for any fuel leaks or other issues.
- **Clear the Area**
Make sure to remove any rocks, sticks, or other debris from the lawn, and always ensure that children and pets are a safe distance away from the area.
- **Proper Operation**
Start your mower on a flat surface, never on a slope. Always keep your hands and feet away from the mower blades while operating it, and turn off the mower before adjusting, cleaning, or refueling.
- **Be Aware of Your Surroundings**
Avoid mowing when the grass is wet or conditions are slippery. Be cautious of obstacles like rocks, power lines, or other hazards that might be in the mowing area.

Energy solutions that fit your business

Your business is unique—from the operation to the space to the impact on your community. That's why the **DTE Energy Efficiency Program for Business** offers a wide range of solutions. You can take advantage of one, a few, or reach out for one-on-one guidance with an expert. These solutions could include:

Rebates

Receive rebates when you make qualifying, energy-efficient purchases or improvements at your business.

Direct install

Your business may qualify for installations of complimentary energy-saving products to help kickstart your path to efficiency.

Energy assessments

At no cost to you, we can walk through your space, show you opportunities for efficiency and discuss any improvements you may have in mind.

Instant discounts

Save instantly on qualifying lighting, food service and equipment through participating distributors.

Compressed air and steam trap surveys

Receive complimentary surveys and learn about rebate finding and fixing failed steam traps and compressed air.

Comprehensive solutions

Take a whole-facility approach to your business' energy efficiency with retro-commissioning, strategic energy management or self-directed electric plan solutions.

Get started today

Compressed Air and Steam Trap Efficiency

Compressed Air/Steam Overview

New for 2025

- Contractor-driven program
- We partner with you to drive savings
- EAs identify lead opportunities
- Opportunities to increase your business
- Can be customer or contractor repaired

Compressed Air Nozzles

Provide Free Fixed or Handheld Air Nozzles to customers

DTE

CleanVision
Energy Efficiency

Retro Commissioning "RCx"

RCx Overview

Customer-driven, multi-track version of SEM with less time and commitment required from the customer.

Benefits for contractors:

- Contact us for tune-up process and control work
- Proactive approach to supporting customers on prescriptive and non-prescriptive measures, creating project opportunities
- Customers tend to reinvest into the program for additional energy-efficiency opportunities

The DTE logo is positioned on the left side of the slide. It consists of the letters 'DTE' in a bold, dark blue, sans-serif font. Behind the letters is a graphic of thin, light blue lines radiating outwards from a central point, resembling a sunburst or a fan of energy lines.
