

Small and Medium Business Program

Energy efficiency **made easy**

The DTE Energy Small and Medium Business Program can help your business save. Learn about your business' energy health, become more energy efficient and improve your space. It all starts by scheduling a no-cost, no-obligation appointment, where your business will receive a(n):

Energy assessment

A qualified energy advisor will walk through your space, show you opportunities for efficiency and discuss any improvements you may have in mind.

Energy-saving products

During your assessment, we will install complimentary energy-saving products, such as LED screw-in bulbs and LED open signs to help kickstart your path to efficiency.

Personalized energy report

This document will provide a recap of your assessment along with recommendations for optional energy-efficient upgrades and available rebates.

Available rebates

In addition to the no-cost program benefits, your business can also receive rebates when you make qualifying energy-efficiency improvements. These rebates are designed to make the project more affordable and reduce your upfront costs. Rebates are available for a range of qualifying upgrades, including:

- Interior and exterior LED lighting
- LED refrigerated case lighting
- Anti-sweat controls
- Strip curtains
- Door gaskets
- Occupancy sensors
- Electronically commutated motors (ECM)
